

# Sentinel looping

Write a program that prompts the user for text until the user types 'quit', then output the total number of characters typed.

Must match format of expected output (class website).

No if or if/else, etc allowed!

Two example outputs (in bold text):

Type a line (or "quit" to exit): 1234567890

Type a line (or "quit" to exit): 123

Type a line (or "quit" to exit): quit

You typed a total of 13 characters.

...

Type a line (or "quit" to exit): qUiT

You typed a total of 0 characters.
