

$$x^2 + y^2 + 2dx + 2ey + f = 0$$

$$C(x, y) = F(x, y)$$

$$a = \pi r^2$$

Good Afternoon!

Make sure ur rdy 2 go
when the bell rings!

(51)

(58)

$$\textcircled{A} \quad \frac{60}{360} 2\pi r_A = \frac{1}{6} 2\pi r_A = \frac{\pi r_A}{3}$$

$$\textcircled{B} \quad \frac{45}{360} 2\pi r_B = \frac{1}{8} 2\pi r_B = \frac{\pi r_B}{4}$$

$$\frac{A}{B} = \frac{\frac{\pi r_A}{3}}{\frac{\pi r_B}{4}} = \frac{r_A}{3} \cdot \frac{4}{r_B} = \frac{4r_A}{3r_B}$$

$$A:B \iff \frac{A}{B} = \frac{\frac{\pi r_A}{3}}{\frac{\pi r_B}{4}}$$

$$4r_A : 3r_B$$

which is bigger? r_B because
it take more r_A 's
to match it.

if $r_B = 4$, then $r_A = 3$

$$r_A : r_B \\ \textcircled{3:4}$$

$$\text{so } r_B > r_A .$$

(59)

Thm 7-15: Area of a circle

$$A = \pi r^2$$

Defn: Sector

The region between 2 radii and the included arc.

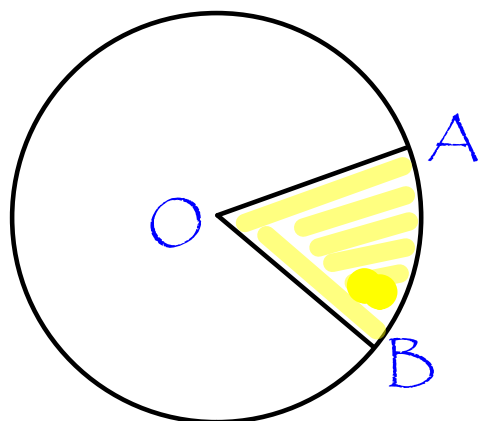

Defn: Sector

The region between 2 radii and the included arc.

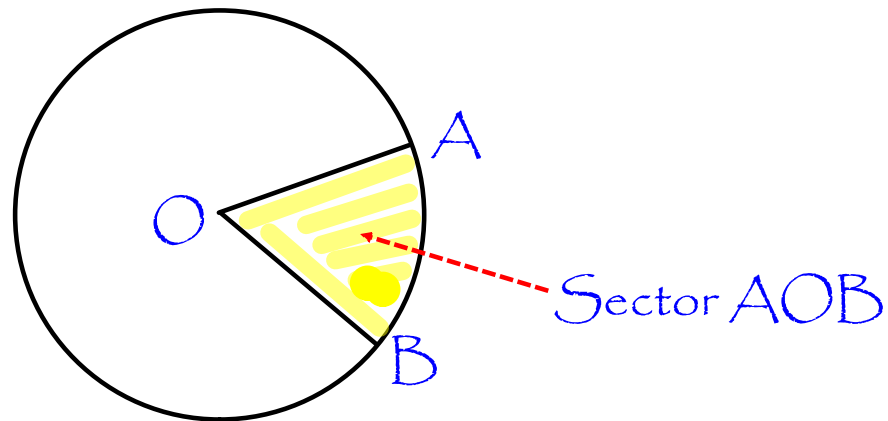

Defn: Sector

The region between 2 radii and the included arc.

Defn: Sector

The region between 2 radii and the included arc.

Area of a Sector

What info would you need to determine the area of sector AOB ?

Area of a Sector

What info would you need to determine the area of sector AOB ?

Area of a Sector

What info would you need to determine the area of sector AOB ?

Area of a Sector

What info would you need to determine the area of sector AOB?

...the arc is a fraction of the whole circle...

Area of a Sector

What info would you need to determine the area of sector AOB?

...the arc is a fraction of the whole circle...

$$\text{or } \frac{m\widehat{AB}}{360}$$

Area of a Sector

What info would you need to determine the area of sector AOB?

...the arc is a fraction of the whole circle...

$$\text{or } \frac{m\widehat{AB}}{360}$$

...the sector is a fraction of the circle's area...

Area of a Sector

$$\text{Area of sector} = \frac{m\widehat{AB}}{360} \cdot (\text{area of } \odot)$$

Area of a Sector

$$\text{Area of sector} = \frac{\widehat{m\widehat{AB}}}{360} \cdot (\text{area of } \odot)$$
$$A_{\odot} = \pi r^2$$

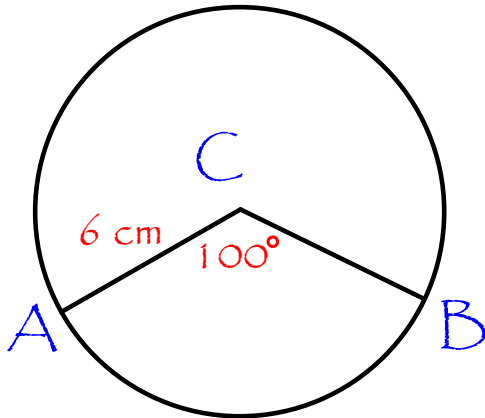

Thm 7-16: Area of a Sector of a circle

$$\text{Area of sector} = \frac{\widehat{m\widehat{AB}}}{360} \cdot \pi r^2$$

Example

Find area of sector ACB. Leave answer in terms of π

$$\begin{aligned} m\widehat{AB} &= 100 \\ r &= 6 \\ A &= \frac{m\widehat{AB}}{360} \cdot \pi r^2 \\ &= \frac{100}{360} \cdot \pi \cdot 6^2 \\ &= \frac{5}{18} \cdot 36 \cdot \pi \\ &= 10\pi \end{aligned}$$

Defn: Segment of a circle

Part of a sector between the arc and a segment joining its endpoints.

Defn: Segment

Part of a sector between the arc and a segment joining its endpts.

Defn: Segment

Part of a **sector** between the arc and a segment joining its endpts.

Defn: Segment

Part of a **sector** between the arc and a segment joining its endpts.

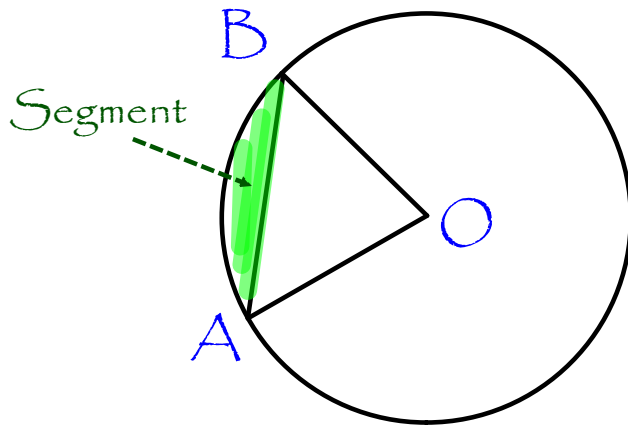

Defn: Segment

Part of a sector between the arc and a **segment** joining its endpts.

Defn: Segment

Part of a sector between the arc and a segment joining its endpoints.

How would we determine the area of a segment?

How would we determine the area of a segment?

The segment and a Δ make up the sector...

How would we determine the area of a segment?

The segment and a Δ make up the sector...

$$\dots\text{so } A_{\text{seg}} = A_{\text{sector}} - A_{\Delta}$$

How would we determine the area of a segment?

The segment and a Δ make up the sector...

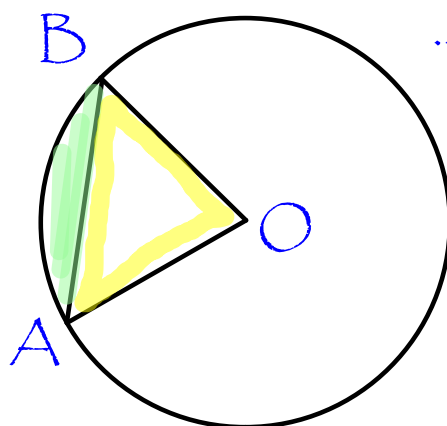

$$\dots\text{so } A_{\text{seg}} = A_{\text{sector}} - A_{\Delta}$$

$$\frac{\widehat{mAB}}{360} \cdot \pi r^2$$

How would we determine the area of a segment?

The segment and a Δ make up the sector...

$$\dots\text{so } A_{\text{seg}} = A_{\text{sector}} - A_{\Delta}$$

$$\frac{\widehat{mAB}}{360} \cdot \pi r^2$$

$$\frac{1}{2} b h$$

How would we determine the area of a segment?

The segment and a Δ make up the sector...

...so $A_{\text{seg}} = A_{\text{sector}} - A_{\Delta}$

$$\frac{\widehat{mAB}}{360} \cdot \pi r^2$$

$$\frac{1}{2} b h$$

Example

Find the area of segment MON.

Round to nearest 10th.

$$A = 192\pi - 144\sqrt{3} \text{ ft}^2 \approx 353.8 \text{ ft}^2$$

$A_{\text{sector}} \quad A_{\Delta}$
