Navigation Plan

I will have a logo at the top.

When you get to the page there will be links to all of the players and their info, storm history, Coaches, Rivalry, and game schedule. These links are on a top horizontal bar. The players link will have a team roster and each player's picture will link to their information.

To go back to the home page I will have a link that is on the horizontal bar that says home and takes you back to the home page.
